

PLAN OF ACTIVITIES

(For the Year 2025)

S. No.	Activity	Time Frame		Financial Impact Rs. (Max)	Intended Goals
		Date of Commencement	Date of Accomplishment		
1.	Implementation of Farmers Training Programme				
	Agriculture is the world's second largest source of employment and one of the most dangerous as well. Many agricultural workers suffer occupational accidents and illness each year. Our stewardship programs raise awareness of the hazards and risks associated with agricultural work, and share knowledge of how these can be effectively managed. We train as many farmers as possible through local partnerships. We understand that training alone does not guarantee a tangible impact on safety. So we track the effectiveness and impacts of labor safety training programs and identify bottlenecks that prevent behavioral change.	08.07.2025	12.07.2025	16,000/-	Training programme is aimed at creating awareness among the farming community about agri safety products and also management techniques and lending procedures, etc.
2	Guava Orchards Management				
	Pakistan Agriculture & Dairy Farmers Association launched an awareness programme of Guava Orchards. As already stated guava is successfully grown under tropical and subtropical climatic zones. In areas having distinct winter season, the yield tends to increase and quality improves. Guava trees are planted at a distance of 5-6 meters. Trees grow rapidly and fruit in 2-4 years. They live 30-40 years but productivity declines after the 15th year. Orchard may be rejuvenated by drastic pruning. In guava, fruits are borne on current season's growth. Manuring and fertilization encourages vegetative growth and fruiting. A balanced supply of NPK gives increased yield with quality fruit.	21.09.2025	28.09.2025	15,000/-	This seminars improve the Guava production at international level.
3	Katta Wachha Breeding Programme				
	Pakistan Agriculture & Dairy Farmers Association through seminars, The survey was conducted in six villages at two experimental sites (Chiniot and Sahiwal). Fifty five households from each village were interviewed using stratified random sampling method. Information about livestock inventory, production of goat, type of production systems and parameters, management of goat, and breeding strategies were recorded.	17.11.2025	21.11.2025	18,000/-	Promote awareness at public level for raising of good quality Katta & Wachha as pets

4	Milking Machine				
	The Founder Chairman, Pakistan Agriculture & Dairy Farmers Association an awareness campaign in different Farm about Milking Machine & Milking Parlour. Milking machines are being abundantly used in modern dairy farms. These days most modern milking parlors have been fixed there. It is very important to choose the best breed of dairy animals for successful dairy farming.	02.02.2026	05.02.2026	16,000/-	For Milking Machine & Milking Parlour

GENERAL SECRETARY
